

Finding Aid to The HistoryMakers® Video Oral History with Dr. Barbara Ross-Lee

Overview of the Collection

Repository:	The HistoryMakers®1900 S. Michigan Avenue Chicago, Illinois 60616 info@thehistorymakers.com www.thehistorymakers.com
Creator:	Ross-Lee, Dr. Barbara
Title:	The HistoryMakers® Video Oral History Interview with Dr. Barbara Ross-Lee,
Dates:	July 25, 2007
Bulk Dates:	2007
Physical Description:	7 Betacam SP videocassettes (3:15:17).
Abstract:	Academic administrator and osteopathic physician Dr. Barbara Ross-Lee (1942 -) was the first African American woman to become the dean of a medical school when she was appointed at Ohio University's College of Osteopathic Medicine. Ross-Lee has also served as the dean of the College of Osteopathic Medicine at New York Institute of Technology. Ross-Lee was interviewed by The HistoryMakers® on July 25, 2007, in New York, New York. This collection is comprised of the original video footage of the interview.
Identification:	A2007_212
Language:	The interview and records are in English.

Biographical Note by The HistoryMakers®

Academic administrator and osteopathic physician Dr. Barbara Ross-Lee was born on June 1, 1942, in Detroit, Michigan, to Fred Ross, Sr. and Ernestine Moten, the oldest of six children. One of her younger sisters is entertainer Diana Ross and two of her brothers also pursued musical careers; one as a successful songwriter for Motown and one as a dancer with Diana Ross' tours. Although Ross-Lee was originally interested in a career in show business, her interests soon turned to medicine. In 1960, Ross-Lee entered Wayne State University, where she studied biology and chemistry. After graduating in 1965, Ross-Lee briefly pursued a teaching career; as a member of the National Teacher Corps, she taught in Detroit Public Schools and earned her M.A. degree from Wayne State University.

In 1969, Ross-Lee's focus returned to medicine, and she entered Michigan State University's new College of Osteopathic Medicine. After graduation she opened a family practice in Detroit in 1973. She left private practice in 1983 and joined the U.S. Navy Reserves as a physician and became a professor at Michigan State University in the Department of Family Practice. Ross-Lee became a consultant on education in the health professions in 1984 for the U.S. Department of Health and Human Services. In 1990, Ross-Lee served as a community representative on the Governor of Michigan's Minority Health Advisory Committee. Ross-Lee, already chair of the Department of Family Medicine at Michigan State University, received a Robert Wood Johnson Health Policy Fellowship also in 1991, which allowed her to spend a year working as a legislative assistant for health in the office of Senator Bill Bradley. After the fellowship, Ross-Lee returned to Michigan State University as an associate dean for health policy in the College of Osteopathic Medicine.

In 1993, Ross-Lee was named dean of the College of Osteopathic Medicine at Ohio University. She became the first African American woman to be dean of a medical school and one of only a handful of female deans in the country. After a notable career in Ohio, Ross-Lee was appointed vice president for health sciences and medical affairs at the New York Institute of Technology in 2001 and one year later, she became dean of the school's College of Osteopathic Medicine.

Ross-Lee has lectured extensively and written many scholarly articles on osteopathic medicine. She is a strong advocate for the profession and its preservation. Ross-Lee has been active in the American Osteopathic Association, the American Association of Colleges of Osteopathic Medicine, the National Osteopathic Medical Association and the Association for Academic Health Centers. She has been a captain in the U.S. Naval Reserve Medical Corps, and she and her husband, Edmond Beverly, have raised five children, all of whom have pursued professional careers.

Dr. Barbara Ross-Lee was interviewed by The HistoryMakers on July 25, 2007.

Detailed Description of the Collection

Series I: Original Interview Footage, July 25, 2007

Video Oral History Interview with Dr. Barbara Ross-Lee, Section A2007_212_001_001, TRT: 0:30:45 2007/07/25

Barbara Ross-Lee was born on June 1, 1942 in Detroit, Michigan. Her father, Fred Earl Ross, was born in West Virginia, and raised in Detroit, Michigan by his cousins when his mother died. Her mother, Ernestine Moten Ross, was born in Union Town, Alabama, the youngest of twelve children. Ross-Lee's maternal grandfather was a Baptist minister for many churches throughout Alabama. Ross-Lee describes her childhood in Detroit, Michigan, and her responsibilities as the oldest of five children. She recalls the sights, smells and sounds of her childhood, which include the sight of crowded housing, the smell of her aunts and uncles in the South, and the sound of music from the radio. Ross-Lee discusses the presence of gospel music in their lives, their leisure activities, and her early education.

Barbara Ross-Lee discusses her early education and the influence of religion in her family. Ross-Lee attended Balch Elementary School in Detroit, Michigan. She describes the education she received as excellent. She lists her favorite subjects, which included biology and math. Ross-Lee's family attended Scott Methodist Church, and while living and visiting the South, their entire social lives revolved around education and church activities. Ross-Lee describes her family's summer trips to Bessemer, Alabama, and describes the events surrounding her mother's contracting tuberculosis, during which time they lived in Alabama with an aunt. Ross-Lee discusses her adolescent relationship to her sister, Diana Ross, and family struggles and financial hardships during her childhood.

Video Oral History Interview with Dr. Barbara Ross-Lee, Section A2007_212_001_003, TRT: 0:31:11 2007/07/25

Barbara Ross-Lee discusses her family's transition into Detroit's public housing, high school, and her educational experience. Ross-Lee's family was forced into public housing around 1957, after her father's employment decreased. Ross-Lee attended Cass Technical High School, where she focused on math and science. Ross-Lee describes the school environment as highly competitive and as a student, participated in sports and performing arts. She describes planning for college, which was a challenge due to financial hardship. In 1960, she was admitted to Wayne State University, where she earned her B.A. degrees in biology and chemistry. Ross-Lee discusses the challenges of being a pre-medical student, and the difficulties for African American and female students pursuing medicine. During Ross-Lee's undergraduate years, her younger sister Diana Ross was beginning her career as a singer. Ross-Lee discusses her sister's growing fame and her parents' reactions to Diana Ross' burgeoning career.

Video Oral History Interview with Dr. Barbara Ross-Lee, Section A2007_212_001_004, TRT: 0:30:32 2007/07/25

Barbara Ross-Lee discusses graduating from college and her introduction to osteopathic medicine. Ross-Lee graduated from Wayne State University in 1965 with her B.S. degrees in biology and chemistry, after which she was hired as a medical technician at Martin Place Hospital, an osteopathic hospital in Detroit, Michigan. She discusses meeting her first husband, James Lee, while attending Wayne State University. They married in 1963, and she gave birth to her first child in 1965. She discusses earning her M.A. degree in education, and her path to osteopathic medicine. Nearly two years after working in the lab, she was advised to apply to the newly opened Michigan College of Osteopathic Medicine, which later became a part of the Michigan State University medical school. Ross-Lee defines and explains the differences between conventional and osteopathic medicine and discusses the biases she encountered as a medical student.

Barbara Ross-Lee discusses the impact of the rise to fame of her sister, Diana Ross. While Ross-Lee was a medical student at Michigan State University, Diana Ross was gaining more notoriety as a performer. Ross-Lee describes being treated more fairly in school once her sister became famous. Ross-Lee talks about career beginnings. After graduating from medical school, she interned at Martin Places Hospital and opened a private practice in 1974 in Detroit, Michigan. She ran the practice until 1983, during which time she joined the U.S. Navy Reserves as a physician. In 1983, Ross-Lee closed her practice to join Michigan State University as chair of the Department of Family Practice. She also discusses her experience in the Robert Wood Johnson Foundation Fellowship Program, where she worked for Senator Bill Bradley on health care policy.

Barbara Ross-Lee discusses her work as an osteopathic medical school administrator for Ohio University, Michigan State University and the New York Institute of Technology. As the Dean of the College of Osteopathic Medicine at Ohio University, Ross-Lee was able to create alliances with hospitals statewide, allocate funding for health programs in Appalachia, Ohio, and build a clinical infrastructure to support medical students. She describes osteopathic medical education and her political work in giving the field a voice in federal legislation. As the Dean for Health Policy at Michigan State University, Ross-Lee created the Heritage Fellowship, funded by the American Osteopathic Association. Ross-Lee discusses the challenges of becoming the Dean of Allied Health at the New York Institute of Technology, where she was able to revise the osteopathic medicine curriculum to better train students given the resources available in New York for students of osteopathic medicine.

Video Oral History Interview with Dr. Barbara Ross-Lee, Section A2007_212_001_007, TRT:
0:11:25 2007/07/25

Barbara Ross-Lee discusses the integration of osteopathic medicine and

conventional medical facilities. Osteopathic medicine is more widely known and accepted, and thus doctor of osteopathic medicine (D.O.) students have become major competition for residencies at allopathic hospitals. She states that the profession is more widely known and that she has enjoyed her career as an administrator. Ross-Lee reflects on her hopes for African Americans in the medical field, and discusses her disappointment in the lack of physical health among minority populations in the United States. Ross-Lee talks about the restrictive nature of minority recruiting in medicine, noting that the recruiting effort is geared towards training minorities to treat minorities. She hopes that more minorities will receive the necessary training and opportunities to treat all communities, so that they are able to help treat health issues in their communities without sacrificing the income of treating wider populations.
