

Biographical Description for The HistoryMakers® Video Oral History with Dr. Floyd Malveaux

PERSON

Malveaux, Floyd

Alternative Names: Malveaux, Floyd;

Life Dates: January 11, 1940-

Place of Birth: Opelousas, Louisiana

Residence: , (from ? to ?)

Occupations: Allergist and Immunologist; Physician; Academic Administrator

Biographical Note

Allergist and Immunologist, physician and academic administrator Dr. Floyd J. Malveaux was born on January 11, 1940 in Opelousas, Louisiana to Inez Lemelle and Delton Malveaux. His mother was a math and science teacher and both parents supported his interest in science and aspirations for higher education. Malveaux did well in school, placing first in a state-wide math competition for minority high school students. He received degrees in biological sciences: his B.S. degree from Creighton University in 1961 and his M.S. degree from Loyola University, New Orleans in 1964. Malveaux went on to Michigan State University where he obtained his Ph.D. degree in microbiology and public health in 1968.

He then served as associate professor of microbiology for Howard University College of Medicine (HUCM), coordinator of the Science Program from District of Columbia Public Schools and coordinator of microbiology for Howard University College of Dentistry. Malveaux received his M.D. degree from Howard University College of Medicine in 1974 where he became interested in immunology, specifically allergic reactions and asthma. Malveaux continued specializing in these areas during his postgraduate studies at

Washington Hospital Center and Johns Hopkins University. In 1978, he rejoined the faculty of Howard University College of Medicine serving as an associate professor of medicine. At HUCM, Malveaux created a training program for allergists/immunologists based on his work in allergies and immunology. In 1986, Malveaux was invited to join the faculty at Johns Hopkins University and also founded the Urban Asthma and Allergy Center in Baltimore, Maryland. In 1989, he returned to HUCM as Chair of the Microbiology Department. His work led to the Community Outreach for Asthma Care, a new treatment program at HUCM. In 1995, Malveaux became the dean of HUCM, forcing him to give up his clinical practice. In 1996, Malveaux was named interim vice president for health affairs at HUCM and served as the principal investigator for a grant from the National Institutes of Health (NIH) for HUCM to establish a major Clinical Research Center. He co-authored a study in 1997 that demonstrated a strong correlation between cockroaches and an increase of asthma in inner city children. Malveaux retired from HUCM in 2005 and joined the Merck Childhood Asthma Network, Inc. as its head.

Malveaux is the recipient of several awards including election to the Institute of Medicine of the National Academies; the National Institutes of Health's (NIH) National Research Service Award; the Outstanding Faculty Research Award from Howard University and the Legacy of Leadership Award from Howard University Hospital. He has served as a member of many professional organizations including on the board of directors for the American Lung Association; the National Allergy and Infectious Diseases Advisory Council and the American Academy of Allergy. He worked extensively with the National Medical Association holding a number of positions including member of the board of trustees and first chair of the Allergy/Immunology Section. Malveaux is a member of the Alpha Omega Honor Medical Society. He and his wife have four adult children: Suzette, Suzanne, Courtney and Gregory.

Dr. Floyd Malveaux was interviewed by 'The HistoryMakers' on March 6, 2012.
