Overview of the Collection

Repository: The HistoryMakers® 1900 S. Michigan Avenue Chicago, Illinois 60616 info@thehistorymakers.com www.thehistorymakers.com

Creator: Frederick, Lafayette, 1923-

Title: The HistoryMakers® Video Oral History Interview with Lafayette Frederick,

Dates: December 15, 2012

Bulk Dates: 2012

Physical Description: 9 uncompressed MOV digital video files (4:20:39).

Abstract: Botanist Lafayette Frederick (1923 - ) developed the concentration in botany at Southern University and Atlanta University, and is professor emeritus in botany at Howard University. Frederick was interviewed by The HistoryMakers® on December 15, 2012, in Tuskegee, Alabama. This collection is comprised of the original video footage of the interview.

Identification: A2012_255

Language: The interview and records are in English.

Biographical Note by The HistoryMakers®

Botanist Lafayette Frederick was born on March 9, 1923 in Dog Bog, Mississippi. Frederick’s interest in botany began as an undergraduate student at Tuskegee Institute (now Tuskegee University) where he was inspired by the famous botanist and plant chemist George Washington Carver. After earning his B.S. degree in biology from Tuskegee Institute in 1943 and his M.S. degree in botany from the University of Rhode Island in 1950, Frederick went on to graduate from Washington State University with his Ph.D. degree in plant pathology and botany. His doctoral thesis focused on spore development in fungi, systematics and ecology of the myxomycetes, and the Dutch elm disease.
Upon completion of his postdoctoral studies at Cornell University, the University of Illinois and the University of Michigan, Fredrick was hired as an assistant professor at Southern University in the biology department. There, he developed a botany concentration during his ten years at the school. He also developed a botany concentration at Atlanta University, where he chaired the biology department during his fourteen-year tenure. In 1958, Frederick was responsible for integrating the Association of Southeastern Biologists meeting, which had not allowed its African American members to attend. He also served as director of the National Science Foundation (NSF) Academic Year Institute for Science Teachers. Frederick worked on several projects that involved studies on antifungal substances of a strain of bacterium. In 1976, Frederick was hired by Howard University where he went on to serve as a professor and chairman in the department of botany, acting dean for the College of Liberal Arts, and emeritus professor of biology.

Among Frederick’s honors are an Honorary Doctorate of Science degree in botany and a Distinguished Alumni Award, from the University of Rhode Island; the Botanical Society of America Merit Award; the NSF Education and Human Resources Directorate Lifetime Achievement Award; the American Association for the Advancement of Science Lifetime Mentor Award; and a Tuskegee Institute Distinguished Alumni Merit Award. A species of Hawaiian shrub, Cyrtandra Frederickii, was named in his honor by Harold St. John, former chairman of the University of Hawaii department of botany.

Lafayette Fredrick was interviewed on The HistoryMakers on December 12, 2012.

Scope and Content

This life oral history interview with Lafayette Frederick was conducted by Larry Crowe on December 15, 2012, in Tuskegee, Alabama, and was recorded on 9 uncompressed MOV digital video files. Botanist Lafayette Frederick (1923 - ) developed the concentration in botany at Southern University and Atlanta University, and is professor emeritus in botany at Howard University.

Video Oral History Interview with Lafayette Frederick, Section A2012_255_001_001, TRT: 1:30:51 2012/12/15

Lafayette Frederick describes his family’s background. His grandparents on both sides were born slaves. Frederick’s maternal grandfather, Robert Johnson, was a wheelwright and worked to give his children education. His paternal grandfather, Oliver Frederick, was an African Methodist Episcopal minister in Coahoma County, Mississippi. Frederick’s mother, Mary Ellen Johnson, was educated to the high school level at Southern Christian Institute in Edwards, Mississippi, and became a school teacher. James Davis Frederick, Frederick’s father, was educated at Stringers Academy in Clarksdale, Mississippi, and also became a school teacher. Frederick talks about how his parents met, describes their personalities, and talks about who he takes after.

Video Oral History Interview with Lafayette Frederick, Section A2012_255_001_002, TRT: 2:29:13 2012/12/15

Lafayette Frederick describes his siblings. Frederick discusses his earliest memories of his mother, Mary Ellen Johnson, picking cotton and his father, James Davis Frederick, teaching school in a church house. His father taught at Dunbar Elementary School, a one-room school in
Concord, Missouri named after the poet Paul Laurence Dunbar because Frederick’s father taught his poetry there. Frederick got started elementary school at the age of three and was taught by his father at Dunbar Elementary School. He describes the sights, sounds and smells of his childhood. Frederick also talks about his family’s exposure to magazines, newspapers, and radio.

Lafayette Frederick talks about radio and his interest in baseball growing up. In the seventh grade Frederick’s father, James Davis Frederick, had him take an evaluation test and the score allowed Frederick to graduate straight to high school. He was sent to live with his aunt in St. Louis, Missouri so that he could go to a better high school, and after a year he returned to attend Haytie High School, Haytie, Missouri and finished his high school education at Washington High School in Caruthersville, Missouri, where he graduated as valedictorian. Frederick describes the moment he became interested in botany and discusses the legacy of George Washington Carver. Frederick decided to attend Tuskegee University but did not have the money to travel to Tuskegee, Alabama. He raised the money by picking cotton but arrived two and a half weeks late and had to convince Tuskegee University to let him stay for the term.
Lafayette Frederick describes his time at Tuskegee University in Tuskegee, Alabama. Frederick excelled in biology and as a sophomore was placed in charge of teaching a biology laboratory class without the aid of a professor. While at Tuskegee University Frederick saw George Washington Carver and heard him speak, and Frederick remembers when he learned of Carver’s death. He talks about his mentors, Dr. Rohm and Dr. Warren Henry. Frederick was involved with Dr. Charles Gomillion’s efforts on voter’s rights and he discusses the voting rights issues of the time. Frederick also talks about people he met at Tuskegee University, such as Daniel "Chappie" James and Nathaniel Colley.

Lafayette Frederick talks about the Tuskegee Airmen. While at Tuskegee Frederick was drafted into World War II. He was able to get it deferred due to his status as a student, and after graduating from Tuskegee University he obtained a job at a turkey farm so that he could benefit from an agriculture deferment. He later became an electrical draftsmannned. in the docks of Vancouver, Washington, and was drafted into the Navy in 1944. He received training as an electrician’s mate and was stationed in Hawaii. Frederick talks about racial discrimination in the Navy. He also describes his feelings at that time of the atomic bombs dropped on Japan. While in Hawaii Frederick was transferred to the engineering branch to work as a draftsman, a position he kept as a civilian even after World War II e
Lafayette Frederick describes his graduate work in botany. He began as a part-time graduate student at the University of Hawaii, Manoa, Hawaii, where he helped describe two new species of plants, one of which was named after Frederick. He left Hawaii in 1948 to attend the Master’s program in botany at University of Rhode Island in Kingston, Rhode Island. There he researched Dutch elm disease. Frederick received his M.S. degree and in 1950 attended Washington State University in Pullman, Washington for his Ph.D. degree. His doctoral research was on the crown-gall problem, a cancerous disease in trees. Upon receiving his doctoral degree he obtained a professor position in 1952 at Southern University in Baton Rouge, Louisiana. Frederick also describes how he met his wife, Antoinette Reed, while he was attending the University of Rhode Island.

Lafayette Frederick describes teaching at Southern University in Baton Rouge, Louisiana. Frederick created the botany major at Southern University. Although his primary focus was teaching, Frederick also researched fungi on the leaves of Louisiana plants. In 1962 Frederick left Southern University to teach at Atlanta University in Atlanta, Georgia because he disagreed with the actions of Southern University’s president, Felton G. Clark. After students had taken part in demonstrations Clark closed Southern University. Because Clark was requiring students to sign an agreement that they would not participate in protests in order to return to Southern University, Frederick and other faculty wrote an open statement of
Frederick and other faculty wrote an open statement of disapproval. Frederick was then placed on a committee to talk to the student demonstrators, discovering afterwards that the committee was used as a pretense for hearings and the students were expelled. Frederick talks about Clark and the leaders of the student demonstrators.

Lafayette Frederick discusses the students he taught at Atlanta University, Atlanta, Georgia and their accomplishments. At Atlanta University Frederick was once again able to research Dutch elm disease and he also studied west Pakistani fungi. Frederick describes the importance of taking students to professional conferences. In 1958 Frederick formed the TriBeta chapter at Southern University and integrated the Association of Southeastern Biologists by bringing the first group of African American students to attend their annual conference. Frederick later served as president of the Association of Southeastern Biologists. He describes teaching at Howard University in Washington, D.C. and the University of Georgia in Athens, Georgia. Frederick describes how he began teaching at Tuskegee University, Tuskegee, Alabama. He is currently researching an endophytic bacterium that can grow in plants.

Lafayette Frederick reflects on his life and legacy, noting his work with students in plant and microbiological
sciences. Frederick talks about his family, the education of his children, and his concerns for the African American community. Frederick describes attending scientific conferences as his hobby. He talks about how he would like to be remembered. To conclude the interview Frederick describes his photographs.
