

Finding Aid to The HistoryMakers® Video Oral History with Marcus McCraven

Overview of the Collection

Repository:	The HistoryMakers®1900 S. Michigan Avenue Chicago, Illinois 60616 info@thehistorymakers.com www.thehistorymakers.com
Creator:	McCraven, Marcus, 1923-
Title:	The HistoryMakers® Video Oral History Interview with Marcus McCraven,
Dates:	March 9, 2013
Bulk Dates:	2013
Physical Description:	7 uncompressed MOV digital video files (3:19:37).
Abstract:	Electrical engineer Marcus McCraven (1923 -) is an electrical engineer who worked to develop the hydrogen bomb at Lawrence Livermore National Laboratory. McCraven was interviewed by The HistoryMakers® on March 9, 2013, in Hamden, Connecticut. This collection is comprised of the original video footage of the interview.
Identification:	A2013_069
Language:	The interview and records are in English.

Biographical Note by The HistoryMakers®

Electrical engineer Marcus R. McCraven was born on December 27, 1923 in Des Moines, Iowa to parents Marcus and Buena McCraven. After graduating from high school, McCraven enrolled at Howard University but was drafted into the U.S. Army during his first year of college. He was listed as an expert rifleman but went on to serve as a supply clerk with an engineering regiment in Papua, New Guinea and in the Philippines. Returning to the United States, McCraven continued his studies at Howard University and graduated with his B.S. degree in electrical engineering.

Upon graduation, McCraven was hired at the Naval Research Laboratory in Washington, D.C. After six months, he was promoted to electrical engineer and became the project leader of the Nuclear Systems Branch. McCraven soon moved to Lawrence Livermore National Laboratory in California where he worked on the hydrogen bomb. His area of expertise on the project was diagnostics and he was instrumental the early development of nuclear weapons, including nuclear tests on Bikini Island and in Nevada. McCraven then joined the research staff at the California Lawrence Radiation Laboratory; and, in the 1960s, he left California and moved to Connecticut where he began to work for Phelps Dodge. In 1970, he joined United Illuminating Co. as the director of environmental engineering and was later promoted to vice president. McCraven has also served as trustee at Quinnipiac University in Hamden, Connecticut. In 2011, McCraven received an Honorary Doctorate of Humane Letters degree from Albertus Magnus College in New Haven, Connecticut.

McCraven lives in Hamden, Connecticut with his wife, Marguerite McCraven, a former social worker in the Hamden Public Schools. They have three children: Paul McCraven, the vice president of community development at New Alliance Bank; Stephen McCraven, a musician living in Paris, Carol McCraven.

Marcus McCraven was interviewed by *The HistoryMakers* on March 8, 2013.

Scope and Content

This life oral history interview with Marcus McCraven was conducted by Larry Crowe on March 9, 2013, in Hamden, Connecticut, and was recorded on 7 uncompressed MOV digital video files. Electrical engineer Marcus McCraven (1923 -) is an electrical engineer who worked to develop the hydrogen bomb at Lawrence Livermore National Laboratory.

A Microsoft Access contact database and a FileMaker Pro tracking database, both maintained by The HistoryMakers®, keep track of the administrative functions involved in scheduling, researching, and producing the interview.

Detailed Description of the Collection

Series I: Original Interview Footage

Video Oral History Interview with Marcus McCraven, Section
A2013_069_001_001, TRT: 1:29:03 2013/03/09

Marcus McCraven shares the story behind his last name. His paternal great-great-grandfather, Mac Craven, moved from Kentucky to Iowa and when he registered the clerk wrote his name as McCraven. McCraven was born December 27, 1923 in Des Moines, Iowa. His mother, Buena Vista Rollins, was born in 1900 in Port Gibson, Mississippi. Her relatives were involved in the North Carolina Mutual Insurance Company and her sister's husband owned a shoe shop in Port Gibson. McCraven's mother graduated from Tougaloo College in Jackson, Mississippi before moving to Iowa. His father, Marcus Harry McCraven, was born in Des Moines in 1901, the son of a Pullman porter. McCraven's mother was a maid and his father was a printer for the owner of 'Better Homes and Gardens.' Though they lived during the Great Depression, McCraven's family never went hungry and owned a home and car.

Video Oral History Interview with Marcus McCraven, Section
A2013_069_001_002, TRT: 2:29:43 2013/03/09

Marcus McCraven talks about his father, Marcus Harry McCraven, a Prince Hall Mason who worked as a printer for 'Better Homes and Gardens.' McCraven's mother, Buena Vista McCrave, met his father when she went to Des Moines, Iowa for her education. They married in the early 1920s and had McCraven and his younger brother, Carl Clarke McCraven. As a child McCraven was interested in sports and acting as well as taking things

apart and fixing things. His parents divorced after junior high school and McCraven moved to Port Gibson, Mississippi. McCraven talks about the math and science courses he took in junior high and high school. His mother moved to Washington D.C. when McCraven decided to attend Howard University. McCraven remembers the influence of construction sites managed by a relative on his interest in engineering.

Video Oral History Interview with Marcus McCraven, Section A2013_069_001_003, TRT: 3:29:27 2013/03/09

Marcus McCraven talks about living with his aunt while attending high school in Vicksburg, Mississippi. He attended Magnolia High School until the eleventh grade and then graduated from Port Gibson High School. His mother, Buena Vista Rollins, then moved to Washington, D.C. so that McCraven could attend Howard University in 1942. During his freshman year McCraven was drafted into the Army because of World War II. He was sent to Papau, New Guinea, where he served in the Army Engineers. Though McCraven was an expert rifleman in a combat zone, he received no bullets for his guns throughout the war. McCraven talks about the segregation present both in the Army and in Washington, D.C. He left the Army in 1946 and graduated from Howard University in 1949. McCraven talks about his time at Howard University and the difficulty he had finding a job as an engineer after his graduation.

Video Oral History Interview with Marcus McCraven, Section A2013_069_001_004, TRT: 4:28:55 2013/03/09

Marcus McCraven describes how he met his wife, Marguerite, while at Howard University in Washington, D.C. After graduating from Howard University in 1949, McCraven started working at the U.S. Naval Research Laboratory. At the Naval Research Laboratory McCraven patented a high current photodiode for use in the testing of nuclear devices. Six months later McCraven moved to Lawrence Livermore National Laboratory in Livermore, California, where he designed the digital diagnostic system for gathering data during nuclear tests. McCraven was on the team that armed the first hydrogen bomb and was present at Operation Castle Bravo, the first test of the hydrogen bomb in Bikini Atoll.

Video Oral History Interview with Marcus McCraven, Section A2013_069_001_005, TRT: 5:28:42 2013/03/09

Marcus McCraven describes nuclear tests and the research they conduct at the test sites. In 1961, McCraven was involved with nuclear tests as part of Operation Plowshare, which was examining peaceful uses of nuclear weapons. He was recruited by the Phelps Dodge Corporation, which was planning to become involved in the peaceful use of nuclear energy. Though that venture never materialized, Phelps Dodge kept McCraven as chief engineer, where he worked on coaxial cable assembly. He moved to the United Illuminating Company, a company in 1970 as the director of environmental engineering. McCraven talks about the politics surrounding nuclear weapons and describes his time in Aldermaston, United Kingdom, where he evaluated nuclear instruments to be sent to the United States.

Video Oral History Interview with Marcus McCraven, Section
A2013_069_001_006, TRT: 6:29:07 2013/03/09

Marcus McCraven describes his time at United Illuminating Company (UI), where he was recruited in 1970. He served as the vice president of environmental engineering, helping UI to obey government regulations and build a low-sulfur coal burning plant in Connecticut. McCraven was also a charter member of the advisory committee for establishing the Environmental Protection Agency. In addition, McCraven was involved in the Yale Peabody Museum and the Red Cross. McCraven talks about the painter Rudolph Zallinger as well as Carlton Highsmith and Bill Strickland, who have made a training program for low-performing students in New Haven, Connecticut. McCraven also talks about his wife, Marguerite, his children, and his grandchildren.
